Closeout Criteria

Definition Of Done

The project is complete when the workflow, research outputs, positioning guardrails, pilot plan, launch sequence, and learning loop are documented and approved by the human decision owner.

Closeout Set

- project brief approved
- market wedge options ranked and reviewed
- evidence ledger updated
- pilot concept ready for next-stage approval
- launch and learning loop defined

Exit Condition

The human can continue with a specific next action: research expansion, positioning draft, pilot design, or launch activation.
