Project Plan

Project Goal

Operationalize a research-to-GTM workflow for FluidLogic's transition from motorsports and tactical performance into elite athlete demand.

Workstream Map

Workstream	Purpose	Owner	Status
Intake & Routing	Classify work and map the sequence of agency steps.	@team-lead + central-orchestrator	Planned
Research	Map competition, athlete pain, wedge options, and evidence gaps.	research-coordinator	Planned
Positioning	Translate race-proven credibility into premium athlete positioning.	distribution-coordinator + marketing-strategy	Planned
Pilot Design	Build the first 90-day commercial test.	learning-coordinator + experimentation	Planned
Sales Enablement	Turn positioning into proof, objection handling, and outreach materials.	distribution-coordinator	Planned
Launch Ops	Activate launch cadence and engagement operations.	distribution-coordinator + community-manager	Planned
Learning Loop	Track pilot response and refine GTM strategy.	learning-coordinator + analytics	Planned
Evidence Review	Validate claims before client-facing use.	truth-agent / risk-and-proof	Planned

Safe Parallel Work

- research the elite athlete landscape
- classify wedge opportunities by buyer, proof burden, and transferability
- draft positioning pillars tied to evidence
- define pilot success metrics and criteria
- prepare sales conversations and outreach assets
- capture launch feedback into a learning loop

Gated Work

- public health or performance claims without evidence
- wellness positioning drift
- athlete-facing messaging without proof review
- launch activity before pilot proof and approval
- pricing or commercial commitments without stakeholder signoff

Next User Decision

Confirm whether the next milestone should be a full research packet, a positioning draft, or a pilot-ready commercial plan.
