i9 Sports AgencyOS Value Map

Opportunity summary

The value opportunity is in turning the manually run operating layer into a structured system of communication, workflow tracking, recurring tasks, and learning loops.

Value map

Problem area	Manual burden	AgencyOS benefit
Parent registrations	scattered intake and follow-up	structured intake, reminders, status tracking
Scheduling	repeated manual updates	workflow tracking and timetable logic
Staff assignment	inconsistent coordination	assignment and follow-up tracking
Communications	reactive parent support	templated flows and consistent reminders
Retention	memory-based follow-up	season-to-season engagement loops
Reporting	disconnected data	operational visibility and pattern detection

Best-fit pilot

Pilot one local or regional franchise with a single sport season and map all communications, scheduling, and staff follow-ups through a structured workflow before expanding to other programs.
