Project Intake

Request

Create project: i9sports-agencyos-value.

Desired Outcome

Evaluate whether AgencyOS can add operational value to a successful i9 Sports-like organization that still runs much of its work manually.

Source-Provided Facts

Website: <https://www.i9sports.com/>

About page: <https://www.i9sports.com/about>

Business model: youth sports leagues, camps, clinics, programs for kids across multiple sports.

Operational signals from site:

- age-appropriate sports instruction
- all skill levels welcome
- no tryouts or drafts
- one day per week schedule model
- trained officials at every game
- emphasis on sportsmanship, coaching, fun, and participation

Operational Hypothesis

The business likely has a high volume of parent communication, league scheduling, staff follow-up, event coordination, and seasonal repeatability. Those are classic AgencyOS opportunities when a company is successful but still manual.

Definition Of Done

The project must produce an operational review, a value hypothesis, and a realistic set of AgencyOS use cases for a successful local or regional youth sports business.
