Revenue and Retention Workstream

Goal

Assess how AgencyOS could improve retention, conversion, and operating leverage in a youth sports program business.

Likely value levers

- more timely parent communications
- smoother seasonal re-registration campaigns
- better coach retention and staffing visibility
- improved parent satisfaction through consistent follow-up
- less lost time from manual coordination and missed tasks

Recommendation

AgencyOS is most likely to create value as a retention and operational leverage tool rather than as a front-end growth engine by itself. The gains come from reducing the cost of managing the business well.
