FluidLogic Pilot Brief

Pilot Objective

Run a narrow, measurable athlete pilot that proves FluidLogic can enter the elite athlete market with premium, performance-first positioning and a credible proof-backed offer.

Recommended Pilot Scope

Pilot one high-value wedge, not the entire market.

Example: a limited set of athletes in a heat-heavy endurance or training environment with a coach or performance partner involved.

Pilot Design

- narrow segment
- short duration
- defined buyer and influencer
- success metrics agreed in advance
- weekly learning review

Metrics

- number of qualified conversations
- conversion to paid pilot or sample distribution
- referral quality
- repeat use or continuation interest
- clarity of proof requirements

Risk Guardrail

Do not promise broad recovery, medical outcomes, or guaranteed performance gains without source-backed evidence and human review.
