Project Intake

Request

Create project: fluidlogic-agencyos-integration.

Desired Outcome

Use AgencyOS Teams to design a research-to-GTM workflow that helps FluidLogic transition from motorsports and tactical credibility into the elite athlete market.

Source-Provided Facts

Client: Juan Benitez

Company: FluidLogic

URL: <https://fluidlogic.com/>

LinkedIn: <https://www.linkedin.com/in/juanmbenitez/>

Products: GPR50 wearable hydration system; VMR vehicle-mounted racing systems; Intelligent Hydration™

Current markets: motorsports, aviation, tactical, industrial, endurance, adventure

Credibility: NASCAR, IndyCar, IMSA, Baja/off-road, tactical, and racing-adjacent performance environments

Brand direction: sleek, premium, performance-first; Apple clarity and Nike Run discipline

Key constraint: avoid generic wellness positioning and preserve race-proven credibility

Strategic Guardrails

1. Do not position FluidLogic as a generic wellness or lifestyle hydration brand.
2. Keep race-proven, data-informed hydration as the central proof point.
3. Build a workflow that is executable by a small team.
4. Every recommendation should be traceable to evidence or customer validation.
5. Keep athlete outcome claims modest and source-bound.

Definition Of Done

The project packet exists, the workflow is mapped, agencies and handoffs are defined, evidence guardrails are clear, and a launch-and-learning loop is ready for human review.
